- A** Apply dry cleaning fluid, use dry towel/cloth. Blot, don't rub. Repeat dry cleaning application as above. Blot, don't rub. Finish with weighted pad of towels.
- B** Scrape or blot up excess spill. Apply detergent, use damp towel. Blot, don't rub. Apply water with damp towel. Blot; finish with weighted pad of towels.
- D** Scrape or blot up excess spill. Apply detergent, use damp towel. Blot, don't rub. Apply ammonia, use damp towel. Blot, don't rub. Apply water with a damp towel. Blot; finish with weighted pad of towels. Apply white vinegar (undiluted), only after stain is removed.
- G** Scrape or blot up excess spill. Freeze with ice cubes. Shatter with blunt object such as back of spoon. Remove chips before they melt.
- L** Apply nail polish remover (non-oily acetone type) to a white, cotton towel and apply to spill. Do not saturate carpet. Pick up softened material using a clean, white paper towel, push toward center of the spot (to avoid spreading material). Repeat above, soften & carefully remove a layer of the material each time. Haste may spread the stain and/or damage carpet.
- M** Apply detergent solution to white towel, leave 3 to 5 minutes. Blot, don't rub. If stain is removed, finish with a water rinse, then blot, then apply a pad of weighted paper towels. If stain is not removed, continue as follows: Apply hydrogen peroxide solution, let stand 2-3 hours under a weighted sheet of plastic wrap. Repeat application of hydrogen peroxide and allow to dry until removal is complete. Apply water with damp towel. Blot, finish with weighted pad of paper towels. Apply white vinegar (undiluted) only after stain is removed.
- O** Scrape off excess material. Cover with white cotton towel or brown paper. Lightly apply warm iron to towel or paper until material is absorbed. Be sure towel is large enough to cover the stained area. Never touch the iron directly to the carpet, as the fiber may melt. Change towel or rotate same towel to a clean area and repeat until all material is absorbed.
- P** Vacuum away as much as possible. Loosen remaining material by tapping with a scrub brush or toothbrush. Tap with brush, do not scrub. Vacuum again. Follow with procedure "B" (scrape or blot up excess spill. Apply detergent, use damp towel. Blot don't rub. Apply water with damp towel. Blot; finish with weighted pad of towels).
